WORK EXPERIENCE

SOFTWARE DEVELOPER (Intern) | Lentii – Denmark

Feb 2026 – Present

- Translated Figma designs into pixel-accurate, production-ready UI from scratch for the trip-list creation flow and merchant onboarding flow integrated them with backend APIs to support end-to-end feature delivery.
- Built the merchant onboarding flow with Stripe integration, handling form validation, error states, and secure data capture across a multi-step UI.
- Implemented UI using Tailwind CSS with a consistent, reusable utility structure, keeping styling scalable and maintainable as flows evolved.

Tech Stack: Angular 13, Tailwind CSS, PHP, MySQL, Asana, Bitbucket, Confluence

SENIOR SOFTWARE ENGINEERING ANALYST | Accenture – India

Nov 2021 – Oct 2024

- Developed and maintained ALIP (Accenture Life Insurance and Annuity Platform), managing frontends and backend REST APIs across Policy, Transactions, Contract Value, and Underwriting modules.
- Refactored validation flows and business logic across frontend and backend layers, restoring contract value calculation accuracy for interest accruals, disbursements, and taxation.
- Optimized SQL queries and normalized schemas, achieving ~25% improvement in API response times while preserving downstream integration compatibility.
- Resolved frontend-backend integration issues in underwriting modules, fixing validation gaps, API contract mismatches, and data formatting inconsistencies.
- Designed and maintained CI/CD pipelines using Jenkins and Git for automated builds, static analysis, testing, and production deployments.
- Implemented and supported CI/CD pipelines using Jenkins and Git for automated builds, static code analysis, unit testing, and deployments, helping ensure reliable and repeatable release cycles.

Tech Stack: Angular (11/12), Java (8/11), Spring Boot, RESTful APIs, JSON/XML data interchange, Business Rules Engine (BRE) for policy calculations and underwriting decisions, SQL (MySQL/Oracle/PostgreSQL), CI/CD (Jenkins, Git) for automated builds and deployments.

SOFTWARE ENGINEER | Infosys – India

July 2018 – Nov 2021

- Built frontend platforms for deployment automation, release management, and operational analytics across QA, Dev, and Release workflows.
- Built responsive, cross-browser UI using semantic HTML5 and CSS/SCSS across analytics dashboards, a defect tracker, and billing automation tools.
- Applied WCAG-aligned accessibility practices through keyboard navigation, ARIA labelling, colour contrast ensuring consistent UX across QA, Dev, and Release workflows and devices.
- Created analytics dashboards using Chart.js/D3.js to visualize test metrics, defect trends, and release readiness from real-time data.
- Built a Kanban-style Defect Tracker integrating JIRA for real-time issue sync, automated ticket creation, and defect lifecycle management.
- Improved frontend performance through lazy loading and modular component architecture, reducing load times across multi-vendor dashboards

Tech Stack: Angular (5/12), HTML5, CSS/SCSS, D3.js, Chart.js, JSON/XML, REST APIs, Git, Jenkins, Agile (Jira, Rally)

EDUCATION

Bachelor of Technology in Electronics and Communication

Nirma University – India | July 2014 – June 2018

TECHNICAL SKILLS

Frontend:	Angular, JavaScript, HTML, CSS/SCSS
Backend:	Java, Spring Boot, PHP, REST APIs
Databases:	MySQL, Oracle, PostgreSQL
Visualization & Libraries:	D3.js, Chart.js, Angular Material & CLI
DevOps & Tools:	Git, GitHub, Jenkins, Jira, RunDeck, Bitbucket, Confluence
Platforms:	Linux, Windows, VS code, Eclipse, Dev containers

SOFT SKILLS

- Strong ownership and analytical problem-solving skills
- Adaptable and effective in fast-paced Agile environments
- Curious and quick learner with strong collaboration abilities
- Excellent written and verbal communication skills

LANGUAGES

English	Fluent
Hindi	Fluent
Gujarati	Native
